

ASPHALT VS. METAL

WHO COMES OUT ON TOP?

FACT

Requires reroofing every 10 to 20 years

FACT

Traps and absorbs heat from the sun into your home, increasing energy bills to maintain a cool, comfortable temperature

FACT

Basic designs and dull looks, lacking aesthetic appeal to potential buyers

FACT

More susceptible to severe weather conditions, costing homeowners thousands of dollars in repairs

FACT

Hurts the environment, generating 7 to 9 million tons of waste each year, which you have to pay to have dumped into a landfill

FACT

Can last 40 to 60 years, maintaining a healthy sheen throughout its lifetime

FACT

Reflects sunlight and can save up to 25% more than asphalt roofs in energy costs

FACT

Comes in a wide variety of vibrant colors and designs

FACT

Can withstand decades of abuse from hail, high winds, heavy snow and other extreme weather conditions

FACT

Eco-friendly – Created from recycled materials, better protecting the environment. When you replace your metal roof, the installer will even offer you a scrap credit
